

Terra Visus and TomTom partner to provide licensed global coverage street-level data

Edinburgh, Scotland – 16th October 2023 – Terra Visus Ltd, a leading provider of street-level imagery and LiDAR data, today announced a partnership with TomTom, the location technology specialist, to provide licensed global coverage data through Terra Visus’s street-level data platform.

The partnership will enable Terra Visus to offer its customers access to TomTom’s global coverage street-level data, which includes high-resolution, geo-referenced spherical imagery and LiDAR. This data will be available through Terra Visus’s street-level data platform, which makes it easy to license for integration into a variety of applications.

“We are delighted to partner with TomTom to give our customers on-demand access to their world-class street-level data,” said Cameron Ure, CEO of Terra Visus. “This collaboration enables us to provide our customers with a more comprehensive and precise perspective of major world cities and road networks, enriching our customers’ offerings and enhancing their global impact.”

“We are pleased to partner with Terra Visus to make our street-level data available to their customers,” said Aaron Golden, SVP Global Enterprise Sales at TomTom.
