

Terra Visus and Autori partner to deliver innovative street-level data solutions

Edinburgh, Scotland, 13th September 2023 - Terra Visus Ltd, a leading provider of street-level imagery and LiDAR data, today announced a new partnership with Autori Oy, a developer of digital solutions for managing road and street workflows based in Finland.

The partnership will enable both companies to offer a wide selection of comprehensive solutions to customers, from a platform of licensed worldwide street-level imagery and LiDAR data to implementing verified work management solutions for different applications in road and street maintenance and electricity distribution maintenance.

"I am delighted to announce our partnership with Autori," said Andrew Baddeley, Chief Operating Officer at Terra Visus Ltd. "We look forward to collaborating closely with Autori to leverage our position as a leading provider of street-level imagery and LiDAR data and to bring the pioneering Autori Vista image management SaaS to a wider audience. This collaboration marks a significant step forward in our mission to deliver accurate, intelligent visual data which is used to better understand and interpret the world around us."

"As Autori looks to expand into new products and geographies, we are excited to partner with Terra Visus," said Jan Mäkelä, Autori CEO. "Autori has created a number of SaaS-based solutions with an image management service for comprehensive supervision of road, street and other mobility projects. We are pleased that Terra Visus can now integrate our solutions alongside their existing street-level data platform."

This unique partnership promises to offer immense benefits to various users, including urban planners, emergency responders, government public works agencies and property tax inspectors.

END
